

# \$HUNT Whitepaper

Version 1.3 | August 23 2025

---

## Executive Summary (TL;DR)

\$HUNT is pioneering the next evolution of memecoins: a reward-driven token that sustains its ecosystem through community participation. Built on Solana, it empowers everyday users to unlock \$HUNT & SOL rewards through games, raids, tipping, and contributions. With self-burning mechanics to reduce supply, small fees funding future growth, and multi-layered utilities like a Telegram bot for raid-to-earn, tipping, games, and competitions, \$HUNT creates endless engagement loops. As it scales, community experiments with real-world tie-ins and unique NFT utilities will fuse meme culture with tangible experiences.

Total supply: 1B tokens. Taxes: 5%.

Vision: The first memecoin where participation itself fuels culture, rewards, and growth.

**BURN. HOLD. EARN. REPEAT.**

---

## Tokenomics

- **Initial Total Supply:** 1,000,000,000 \$HUNT
- **Taxes:** 5% on all transactions, allocated for ecosystem sustainability.
  - **3.5% SOL Rewards:** Funds accumulate in a dedicated rewards wallet that fuels gamified SOL reward drops. Eligibility depends on activity and token holdings. Rewards are not guaranteed and function as part of the engagement system, not as a financial instrument.
  - **0.5% Automatic Self-Burn:** Reduces circulating supply over time.
  - **1% Growth Wallet:** Supports marketing, development, and ecosystem expansion. Transparent spending, with funds tracked on-chain.
- **Distribution**
  - 80% Liquidity Pool: Deep initial pool, permanently secured (LP tokens burned).
  - 5% Marketing
  - 5% Community Airdrops
  - 4% Team Fund
  - 3% Partnerships
  - 2% Future Liquidity
  - 1% Charity
- **Fair Launch:** No presales, no insider allocations.

This structure creates a self-reinforcing loop: activity fuels rewards, burns, and growth, making \$HUNT a sustainable community-powered system.

---

## Key Features and Utilities

- **Engagement Rewards:** Community members can unlock \$HUNT or SOL rewards by holding and actively participating (no guarantees).
  - **Deflationary Mechanics:** Automatic self-burns reduce supply over time, increasing the price.
  - **Telegram Hunt Pack Bot (V1):** Raid-to-earn, tipping, games, and competitions built directly into the chat ecosystem.
  - **In-House Games:** Lotteries, challenges, and trials with provably fair mechanics.
  - **Multi-Layered Participation:** Active contributions (content, raids, community help) unlock additional perks.
  - **NFTs with Utilities:** NFTs provide access to exclusive features, events, and community perks. They may interact with in-ecosystem rewards but do not represent profit-sharing or financial entitlements.
  - **Exploratory Real-World Tie-Ins:** Community-led experiments with businesses or real-world perks may be tested in the future, subject to regulatory feasibility.
  - **AI Hunter Bot:** Fun and intelligent interactions, moderating chat and powering gamified mechanics.
- 

## Roadmap

### Phase 1 – Ignition

- Activate self-burns and community reward loops.
- Complete airdrops and initial incentives.
- Deploy Telegram Hunt Pack Bot (raid-to-earn, tipping, games).
- Run early competitions to reward dedicated participants.

### Phase 2 – Amplify

- Expand socials: X, TikTok, Reddit, Instagram.
- Launch e-commerce for merch with token integration.
- Release NFTs with community utilities and perks.
- Introduce “Hunter Trials” gamified contribution and competition systems.
- Spark viral hype with targeted events and campaigns.

### Phase 3 – Fusion

- Explore community tie-ins with real-world businesses for perks and integrations (subject to regulation).
  - Leverage AI for advanced community tools and reward systems.
  - Position \$HUNT as a hybrid of meme culture, AI-powered gamification, and real-world experimentation.
- 

## Community Philosophy

\$HUNT is a pack movement. Rewards are about participation, activity, and culture-building.

- Holders may be eligible for reward events.
- Contributors unlock additional perks.
- Leaders shape new projects for amplified engagement.

The pack thrives on **fun, fairness, and decentralization**. No hierarchies just a movement built by Hunters.

---

## Security and Transparency

- **Liquidity Burned:** LP tokens destroyed to eliminate rug risk.
  - **Transparent Funds:** Rewards and Growth Wallets tracked on-chain.
  - **Bot & Game Security:** Open-source modules where possible, using provably fair mechanics.
  - **Team Allocation:** Transparent vesting and usage policies.
- 

## Disclaimer

\$HUNT is a community-driven meme project. Rewards are gamified and never guaranteed. Cryptocurrency is volatile and involves risk. This is not financial advice. DYOR.
